

UltraGold™ 14 Series

P30-14-UC with UltraClear™ Filtration

The UltraGold 14 gas fryer combines efficiency and high production in a compact footprint.

This model has three 14 in. vats, each with a 35-45 lb. oil capacity. You also have the option to connect up to six vats.

Our UltraClear™ filtration system cleans shortening to increase food quality and extend oil life.

Our patented PAR-3 phased-array heat exchanger is perfect for menu items that require higher heat and faster cooking times. It's designed to direct heat through multiple baffles and turns, resulting in highly efficient transfer of energy to the oil and more even heat distribution, virtually eliminating recovery times.

The UltraStat® 23 controller, which includes ten keys for easy menu programming, allows you to maintain consistent temperatures and hold times.

The UltraGuard™ automatic melt cycle brings shortening to temperature without scorching or overheating.
