Midnight Black

Forest Green

EQS™

Exchange Quick System

With that intuitive system, the EVS squeezing kit is grouped into a single block minimising the number of parts. Easily assemble and disassemble the squeezing kit in one easy movement. Save time and turn it into profit.

Two modes of use

AUTO

Automatic mode

Squeezing is activated when oranges are detected in the fruit dispenser.

Manual mode

Control the squeezing by yourself using the Play/Pause button.

Rediscover Silence

At Zummo we have developed a new traction system based on independent motors. This system reduces the mechanical friction between parts and minimises the noise level.

Fruit dispenser

Up to 3.3 lbs of fruit in the minimum space. Its sloping design makes it easy to load the fruit and makes it highly visible, creating an eye-catcher in your business.

NEW

Zummo Cloud

Geolocation

Locate and monitor your equipment to ensure the correct use of your Juicer from anywhere.

Productivity metrics

Increase the profitability of your business, knowing the consumption data, time of day, serving, size of serving, among others.

Status indicators

With programmable status alerts you can rest assure that your Viva will be ready for your demands of your busy juice operation.

Preventive and predictive maintenance

Zummo cloud will guide you and give you maintenance alerts and will help you troubleshoot your juicer, thanks to the constant monitoring of the most important parameters.

Automatic filter

An innovative rotating design which guarantees the highest quality and purity of the juice.
